HomeWork 4
Due: 03/16/2022

Given an Api, implement a todo app(features includes Add a todo, Change a todo Status, Delete Todo) in Vanilla JavaScript. FYI: You can add some css styles to your app.

GitHub Link: https://github.com/wikiwikitang/homework-4

Add a todo:

You need to implement the functionality of adding one todo, please refer the screenshot below

Change a todo Status:

When you double click the todo content, the todo status should be changed, please refer the screenshot below

Delete a Todo

You need to implement the functionality of deleting a todo when the user click the delete button, please refer the screenshot below

[ ] Add Todo

- ~~fdfafa~~ Delete Todo

All the homeworks should be submitted via github. We will have a demo session on Mar 16 2022.
